

Computer Science Fundamentals

Facilitator Development Program

2019-20 Cohort

The Computer Science (CS) Fundamentals Facilitator Development Program is designed for US-based facilitators who wish to deliver Code.org CS Fundamentals Professional Learning workshops to educators teaching grades K-5 in their local region. Facilitators apply and are accepted to a one-year development program. Facilitators are paid competitively for meeting program commitments.

Program Qualifications

In order to be considered for acceptance into the Code.org CS Fundamentals Facilitator Development Program, applicants must [meet desired qualifications of a Code.org facilitator](#). Preference will be given to those who have:

- Familiarity with the content and philosophy of the [Code.org CS Fundamentals course](#).
- Recent computer science or STEM teaching experience in elementary school.
- Some familiarity with the [Code.org Professional Learning model](#), through past experience participating in and/or facilitating Code.org workshops.
- Strong background in best practices for preparing elementary school teachers.

Program Commitments

Once accepted, facilitators must commit to meeting or exceeding the following program commitments:

Spring 2019 Facilitator Development

- **Facilitator-in-Training Weekend:** Facilitators will attend and participate in one three-day workshop with other facilitators to strengthen facilitation practice and prepare for facilitating workshops. Lodging, flight, and meals provided by Code.org.

Academic Year Facilitator Support and Impact (2019-2020)

- **Reach and Impact:** Facilitators will work with their local [Regional Partner](#) (where applicable) to plan and lead at least four, one-day workshops, annually.
- **On-going development, support, and mentorship:** Facilitators will utilize facilitator effectiveness survey results to continuously improve workshop quality and stay up-to-date via bi-weekly newsletters and monthly webinars.
- **Program Compliance:** Facilitators will fulfill the above listed commitments and remain in good standing with Code.org and their Regional Partner (where applicable).

Other Commitments: Facilitators are required to abide by the terms of the Code.org Facilitator Development Program, including: Following Code.org guidelines on use of trademarked and Creative Commons-licensed content, respecting our Code.org Privacy Policy and using the Code.org Workshop Dashboard for reporting, scheduling, and communication.
