# Join us at the 2018 Code.org/CSTA State CS Policy Forum

September 27-28 in Denver, Colorado

National momentum around computer science education continues to grow and states driving policy change have similar questions:

- What are the factors for determining the appropriate policy levers for your state?
- What are effective practices for implementing and funding policies that encourage schools to offer computer science?
- What lessons can we learn from other states?

CS Momentum as of May 2018
([Code.org blog](#)[1])

The darker blue represents the 20 states that have passed laws as of May 2018, the lighter blue represents states with initiatives underway

Hosted by Code.org and the Computer Science Teachers Association (CSTA), this forum brings together state and national leaders to participate in lively discussions on current issues, hands-on workshops, flash talks, and networking opportunities.

The forum consists of two parts:

- a pre-forum for Code.org Advocacy Coalition Members on Sept 27 from 9 am to 2:30 pm
- a main forum starting at 3 pm on Sept 27 and ending on Sept 28 at 4 pm.

Registration fees and meals during the forum are provided at no-cost for participants by Code.org, but travel, lodging, and expenses will be the responsibility of the attendee. A limited number of scholarships are available based on need.

Find more information about the forum, including application form, at [advocacy.code.org/state-policy-forum](#).
